PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, and backend development in Java and Python(Pandas,NumPy). Experienced building REST APIs, backend services, and data pipelines, with a proven track record of delivering applications end to end. Seeking a Software Engineer role to apply strong problem-solving skills and a rapid learning ability to large-scale production systems.

TECHNICAL SKILLS

Languages: Java (Intermediate), Python (Pandas, NumPy, Matplotlib), SQL (basic), Node.js (basics)

Backend & APIs: REST API Design, Java HTTP Server, Object-Oriented Programming, CORS, Docker

Data & Cloud: Google Cloud, Hugging Face Spaces, Google Colab

Tools: Git & GitHub, Jupyter Notebook, Grafana (learning), Prometheus, Vscode

Coursework: Data Structures & Algorithms, OOP, Machine Learning, Problem Solving

EXPERIENCE

Data Analytics Intern — Code N Career Inc. (Remote)

Jul 2025 – Aug 2025

- Built an ETL pipeline to ingest CSV data into SQL, improving processing efficiency by 40%.
- Engineered NumPy-based data-cleaning pipelines to standardize incoming datasets before analysis.
- Performed exploratory data analysis and built visualizations using Pandas and Seaborn to surface data-quality issues.

Hackathon Participant — RIFT'26, Physics Wallah Institute of Innovation

Bangalore

- We selected the Web3 Track at virtual meet.
- Built a consent-based data-sharing platform on the Algorand blockchain in a 24-hour national-level Web3 hackathon, giving students control over who accesses their personal data.

TECHNICAL PROJECTS

SmartCom-AI ChatBot — Java, HTTP Server, REST API, Groq LLM

- Developed a Java-based AI chatbot integrated with the Groq LLM API, designing REST endpoints with Java's built-in HTTP server using OOP principles for maintainability.
- Enabled frontend-backend communication by configuring CORS support.

AI Contract & Document Analyzer — React, Vite, FastAPI, MongoDB, Gemini LLM

- Built an AI-powered web application to analyze PDF/DOCX documents, extract key content, assess risk levels, and generate actionable recommendations using Google Gemini.

Air Quality Index Prediction — Python, TensorFlow, OpenCV, Gradio, Hugging Face Spaces

- Developed a deep-learning application estimating PM2.5, NO2 concentration, and AQI from outdoor images, with a real-time Gradio UI deployed as a web application.

Turing Machine Simulator — Python, Gradio, Hugging Face Spaces

- Built an interactive simulator demonstrating deterministic Turing Machine execution.
- Implemented a Gradio interface for real-time visualization and deployed it on Hugging Face Spaces.

CPU Monitoring Dashboard — Grafana, Prometheus

Developed a basic observability dashboard for real-time CPU monitoring using Prometheus and Grafana.

EDUCATION

B.E. Computer Science Engineering — RMD Engineering College, Kavaraipeitai,Thiruvallur District, Tamil Nadu.

Aug 2023 – May 2027

CGPA: 8.04 -No History of Arrears

Higher Secondary Certificate (12th Standard) — Bharathi Matric Higher Secondary School, Kallakurichi District

2022 – 2023

(State Board)- Score: 90%.

CERTIFICATIONS

- Oracle Java SE 17, Infosys SpringBoard— Java Foundation Certificate
- Infosys SpringBoard — Principles of Generative AI, Google Cloud Engineering course
- ServiceNow CAD — Certified Application Developer.
